healing serving caring

CORAL GABLES
Hospital

historic coral gables hospital

Historic Coral Gables Hospital is a 247-bed acute-care facility that has been serving South Dade, Latin America and the Caribbean since 1927. Our multilingual staff reflects the diverse international community it serves, and they continually distinguish themselves with high quality ratings and outstanding service. A boutique hospital with private and semi-private rooms, we are small enough to provide personal service, yet big enough to offer award-winning medical programs that continually rate among the best in the area.

specialized services

cardiovascular services

Our facility is well-equipped and offers comprehensive diagnostic, screening and treatment for cardiac disorders such as angina, heart failure, heart rhythm disorders, hypertension, and heart valve conditions.

emergency care

Our Emergency Department is always ready to deliver care. Our team of emergency physicians and nurses treat major and minor injuries, serious illness and potentially life-threatening emergencies. We also have a special Quick Care Unit for minor injuries and illnesses to better serve our patients.

neuroscience center

Our comprehensive spine program offers everything from rehabilitation and minimally-invasive spinal surgery to diagnosis and treatment of various neurological disorders.

oncology services

The facility offers the latest diagnostic services for breast and prostate cancer. Services include advanced screening and digital mammography, with protocols that ensure every mammogram is interpreted by two board-certified staff radiologists. Prostate screenings are conducted by board-certified urologists.

orthopedic services

The Hip and Knee Replacement Team of professionals include board-certified orthopedists, registered nurses and support staff. The team provides advanced diagnostics, surgical care and follow-up in an atmosphere designed for patient comfort and ease.

outpatient rehabilitation center

Whether patients are recovering from a sports injury, stroke, joint replacement surgery or other condition, Coral Gables' licensed physical and occupational therapists provide comprehensive rehabilitation care.

urology program

Our comprehensive urological program serves men and women. We are a leading center for penile implantation for men with erectile dysfunction. Other conditions treated include: prostate disease, incontinence, kidney stones, kidney disease and bladder disease. Our urologists also offer lithotripsy, a noninvasive outpatient procedure designed to dissolve kidney stones.

outpatient services

We offer conventional and high-tech treatments and diagnostic tools, support services and integrated medicine from a team of experienced specialists. Services include: ambulatory surgery; bone density testing; digital mammography; gastroenterology (GI); endoscopy; gynecology; radiology/imaging and ultrasound.
